Focus Features Ad – Continue reading below Save Private Ryan No list of WWII movies would be complete without Steven Spielberg's film about the invasion of Normandy. The first 25-or-so minutes, which show D-Day in all its horrors, is a horrible hard-to-watch cinematic feat, but that sequence makes the drama that follows about the victim of war all the more touching. Rent it now. The Great Escape As the name of the classic film shows, escape is a constant obsession for the Allied soldiers trapped in a German prisoner of war camp in this fictional ized version of real events. The film stars James Garner, Richard Attenborough, and Steve McQueen as leaders of an attempt to dig their way out of prison. And not to destroy the plot, but the stakes become even higher when freedom becomes reality. Look at that now. Schindler's List Many directors strive to create a cinematic masterpiece; Spielberg has created two, only about the war. In the Oscar-winning Schindler's List, which some see as the definitive Holocaust film, he tells the true story of Oskar Schindler, a German businessman who protects his Jewish factory workers, who saves many innocent lives. Rent it now. Dunkirk Director's Christopher Nolan's fixation at the time is central to his depiction of the miracle of Dunkirk, when British soldiers were evacuated from the shores of German-occupied France by civilian boats. It's one of the great human stories, and it's one of the most exciting situations that I've ever heard of in my life, Nolan said, describing the story. You have 400,000 men—the entire British Army—trapped on the beach at Dunkirk. Their backs to the sea, homes are only 26 miles away and it's impossible to get to. The enemy is approaching, and there is a choice between annihilation and surrender. I just think it is the more extraordinarily exciting situation. I think that speaks to a lot of things that I'm interested in with film. He framed the execution. After three different stories (one on land, one at sea, and one in the air) different timelines, the film leaves you on edge until the very last frame. Rent it now. Reconciliation A beautiful, bleak tale of tragedy and deception set at the beginning of the war, this adaptation of Ian McEwan's novel stars Keira Knightley and James McAvoy as unhappy lovers, and a young Saoirse Ronan in a breakout role. The performances and the story are moving, but it's even worth a watch for costumes, set design and score alone. Rent it now. The Sound of Music The sound of music is not your typical WWII movie. However, Christopher Plumber's tearing up a Nazi flag really earns it a place on this list. Rent it now. The Imitation Game Starring Benedict Cumberbatch, Keira Knightley, and Matthew Goode, The Imitation Game is a look inside Bletchley Park, and a tribute to cryptographer and mathematician Alan Turing, his race to crack the German Enigma machine, and the discrimination he felt due to Homosexuality. Rent it now. Now, by Brothers and Pacific Band of Brothers and Pacific are not movies, per se, but all of World War II cinema would consider these miniseries produced by Tom Hanks and Steven Spielberg must-watch TV. Look at that now. Inglourious Basterd's Inglourious Basterd's is a revisionist story that follows a squadron of Nazi hunters as they try to assassinate Hitler. Watch it now Five came back during World War II, five iconic directors: John Ford, William Wyler, John Huston, Frank Capra, and George Stevens, went into battle to capture what really happened on the front line. This Netflix documentary, narrated by Meryl Streep, is based on their incredible archival material. Look at that now. The birth of a nation | David W. Griffith Corp. Few aspects of life are as devastating and on such an epic scale as war. Throughout film history, films such as Saving Private Ryan, Apocalypse Now and Full Metal Jacket have tackled the battlefield's complex themes with poise, precision and appropriate gravitas. But for all the movies that manage to perfectly capture war on screen, there are so, so many who get it so much, very wrong. Today we take a look at some of these colossal misfires that have hit theaters over the years, to the great misfortune of moviegoers. Moreover, as easy as it would be to gather a list of films that focus solely on major conflicts like World War II, we try to include choices that drive the spectrum of war through history. So, without further delay, let's take a closer look at some of the worst war movies of all time. 1. The Birth of a Nation (1915) Nope, this is not the controversial slave revolt film of 2016. This is the controversial silent film from director D.W. Griffith that is routinely considered one of the most racist films ever made. In addition to portraying African Americans as unintelligent and sexually aggressive, it serves as propaganda for white supremacist organizations like the Ku Klux Klan. Not exactly a fair depiction of the American Civil War. Mutiny (1952) Directed by Edward Dmytryk, this adventure film is set during the War of 1812 and revolves around Captain James Marshall's (Mark Stevens) attempt to get a war loan. Bland and underwhelming, the audience at the time did not know that war can be quite as uninteresting as it is in this ill-conceived release. 3. The Green Berets (1968) Set in Vietnam, this look at one of the most divisive wars of the last century had all it needed to be a smash hit. Starring and co-directed by John Wayne, it actually became a success but failed miserably with critics, who found it boring, offensive, and clichéd. In fact, it is regularly considered a disaster in critical society. 4. Von Richthofen and Brown (1971) In some circles, this film goes by the title The Red Baron, but no matter what you call it, it's a mess of epic proportions. Directed by B-movie legend Roger Corman, it doesn't even work as a guilty pleasure. The fictional story bears no historical resemblance. The film received largely negative reviews and has been mostly forgotten. 5. Midway (1976) As the title suggests, this Jack Smight-directed film chronicles the Battle of Midway, a pivotal turning point in World War II. With a cast that includes Charlton Heston, Henry Fonda, and James Coburn, it was a box office success, although its clichéd dialogue, overuse of stock images, and generally fuzzy filmmaking made it a critical flop. 6. Inchon (1981) This one — directed by Terence Young — follows the Battle of Inchon during the Korean War. Laurence Olivier plays General Douglas MacArthur, and despite the promising aspect, Inchon proved to be a theatrical misfire and that year's biggest financial flop. Furthermore, it is widely considered among the worst films of all time from any genre. 7. Revolution (1985) Al Pacino and Donald Sutherland in a film about the American Revolutionary War? Sounds like a winner, doesn't it? Not if we're talking about this box office and critical bomb from director Hugh Hudson (Chariots of Fire). The film's performance even marked the beginning of a four-year hiatus for Pacino. Too bad for a movie that had such talent both in front of and behind the camera. 8. Iron Eagle (1986) While the story in this film is fictional, it is inspired by the 1981 Gulf of Sidra incident with U.S. attacks on Libya. Jason Gednick and Louis Gossett Jr. lead the cast of this Air Force-centric film, which kicked off a franchise that includes three sequels. It barely served enough to be considered a hit on home video and was far too bland for critics to give its stamp of approval. 9. The Finest Hour (1991) Much like another maligned war movie (oh, we'll get there), this follows two soldiers and best friends whose ties are threatened by a triangle. Rob Lowe and Gale Hansen star as the two leads and Navy SEALs-in-training which sees their friendship ebb and flow with each battle. Don't worry about this. 10. Pearl Harbor (2001) Michael Bay is not known for hard-hitting drama. Still, he tried his hand at this Titanic-esque fictional love story that puts Ben Affleck, Kate Beckinsale, and Josh Hartnett in the middle of a troublesome triangle. Dripping with melodrama, terrible dialogue and subpar performances, there's little to recommend here, apart from some strong visual moments. Over 40 years after the first film was released, Skywalker is the fairy tale in one with the release of Star Wars: The Rise of Skywalker. While this is the end of the road for Skywalker family, this is not the end of Star Wars. Not at all. The floodgates are open and Disney won't let them close any time soon. But the next Star Wars movies aren't exactly confirmed and when they get nailed, they're likely to focus on new characters outside the Skywalker family's galactic journeys. We don't know who the new characters are going to be, but we know who's going to come up with them. For starters, Rian Johnson, who directed The Last Jedi, is developing a new trilogy, and while some fans worry the vitriolic TLJ discourse may derail his affair, he is currently confirmed to write and direct his first film. In shepherding this new trilogy, which is separate from the episodic Skywalker saga, Johnson will introduce new characters from a corner of the galaxy that Star Wars lore has never before explored, reads a November 2017 statement from Lucasfilm. In May, Disney as the release date for the next three Star Wars films: December 16, 2022, December 20, 2024, and December 18, 2026. But if you think Johnson's movies are going to bring up these spots, not so fast. It was a second trilogy planned to be created by Game of Thrones showrunners David Benioff and D.B. Weiss. The first film in their trilogy was the one released in December 2022, but the couple resigned in October, citing their busy schedule with Netflix. So it won't necessarily be Johnson's film that takes its place. It could be. It couldn't be. In addition, there is another film in development, this one from Marvel Studios President Kevin Feige. With the end of the Skywalker Saga, [Lucasfilm President Kathleen Kennedy] pursuing a new era in Star Wars storytelling, and knowing what a die-hard Kevin is, it made sense for these two extraordinary producers to work on a Star Wars movie together. Walt Disney Studios co-chairman Alan Horn told The Hollywood Reporter in September. To boot, Kennedy recently told Refinery29 that Lucasfilm has some announcements that people will be very happy with, while discussing gender and racial diversity among Star Wars directors. So we can look at some groundbreaking development agreements in the very near future. But the movies aren't our only hope, y'all. There may be a significant break between Star Wars movies, but if you find yourself craving a trip to a galaxy far, far away in the meantime, there will be plenty of adventures on the way. Or, you know, you can just watch your favorite movies again. It is not that it has not worked in recent decades. The Page 2Star Wars Skywalker Saga ends this December 20th when The Rise Of Skywalker finally hits theaters, and all anyone can talk about is the galaxy far, far away. Are you planning to watch the movies again before the last chapter? There's a bit of a debate in fandom (when isn't there a bit of a debate in this fandom) over the order to watch Star Wars movies in — and I have the answer. Well, one answer. The Star Wars films that out in the 90s and 00s are prequels to the films released in the 70s and 80s, there are several ways you can approach a rewatch. You can keep it simple and straightforward and watch the movies in order after their original release date: The original trilogy, prequel trilogy, The Force Awakens, Rogue One, The Last Jedi and Solo. You can also watch them in chronological order, which would mean watching The Phantom Menace first, and then slotting Solo and Rogue One between Revenge of the Sith and A New Hope. If you're not one of the prequels, starting with Jar Jar Binks can be tiring, but I will say that going from breathtaking final minutes of Rogue One to a new jump is a thrill. There's also a fan-created Star Wars order called the machete order that was designed specifically to show Star Wars to kids growing up after prequels were released. It preserves twists in the story surrounding Darth Vader and the Emperor's true identities and, sorry for this Swing, completely removes Episode I from the equation. The official machete order is: A New Hope, The Empire Strikes Back, Attack of The Clones, Revenge Of The Sith and Return Of The Jedi — but has become more complicated with the release of Rogue One and Solo. It's quite fun as an experiment, but ultimately a bit of a roller coaster. I suggest watching the Star Wars movies in the release date order with some minor changes. Here's how to do it.
